

# Pipe Fusion Services

Fused pipe is used by many municipalities, contractors and developers for water, sewer and gas.

## What are the Advantages of Pipe Fusion?

- Fused pipes are joined permanently
- Increases production
- Fewer joints in pipe decreases likelihood of leaks
- Pipe comes in coils or sticks from 1/2" to 60" in diameter

## Pipe Fusion Services are available for:

- RESIDENTIAL
- COMMERCIAL
- AGRICULTURAL
- CONSTRUCTION
- INDUSTRIAL

## Fast Facts about Pipe Fusion:

The fused area of the pipe is 4 times stronger than the density of the pipe.

Fusing pipes decreases the likelihood for leaks in the future compared to other methods of joining pipes.

Our qualified staff is trained and experienced to fuse pipes from 1/2" to 36" in diameter in natural gas, water and sanitary.

We can provide sidewall, electrofusion and extrusion welding applications.
